Alternative Hairloss Solutions

Millions of men and women suffer
from hair loss, now you don't have to.

WHAT IS SCALP MICROPIGMENTATION?

Scalp Micropigmentation (SMP) has quickly become the most reliable and effective solution for men and women suffering from thinning hair, pattern baldness, scarring, and alopecia strains. It is the ultimate non-surgical hair loss solution and is considered an incredible life-changing treatment. The Scalp Micropigmentation Technique incorporates medical micro-pigmentation, also known as a “hair tattoo,” which creates follicle size impressions strategically placed on the scalp to replicate realistic hair follicles.

Using micro-needles and custom-blended ink, each impression is applied just below the skin's epidermal layer, creating an illusion of a denser head of hair or a freshly buzzed head.

COVID-19 PROTOCOLS

At Ink2Scalp we follow all the required and necessary protocols for COVID-19.

These practices have always been common for a workplace and will continue to keep the standards as a high priority.

We issue our Covid 19 questionnaire prior to our client's arrival and take temperatures before entering the client and sanitize hands

MEET THE TEAM

"We know how much this means to you. We also know you will be delighted with your results. Our reputation leaves our studio when you walk out the door so it means just as much to us! We will be the one's right by your side through your entire SMP journey. At Ink2scalp continuity is key and our dedication to that and to making sure your results are exactly what you are after is our main mission."

INK2SCALP STUDIO PROCESS

STEP 01 CONSULTATION

We will discuss in-depth the the procedure, hairline design, select SMP ink (non-toxic & organic) and aftercare information. We will also analyze your hair, skin and medical conditions before session #1.

INK2SCALP STUDIO PROCESS

STEP 02 PROCEDURE

Depending on the individual, the final result is typically refined between 3-4 sessions. We will revisit the selected hairline and ink tone before we begin. Each session is an important piece in order to achieve a realistic and quality transformation.

INK2SCALP

STUDIO PROCESS

STEP 03

POST CARE

The first 4 days after each session, avoid disturbing the scalp, showering/shaving, excessive sweating, swimming, and direct sunlight. On the 5th day after treatment, wash gently with lukewarm water, shave with an electric razor, and apply non-scented moisturizer as required. After 21 days from treatment, you may return to normal routines but be sure to moisturize once a day and apply 50+ SPF sun lotion when in direct sunlight.

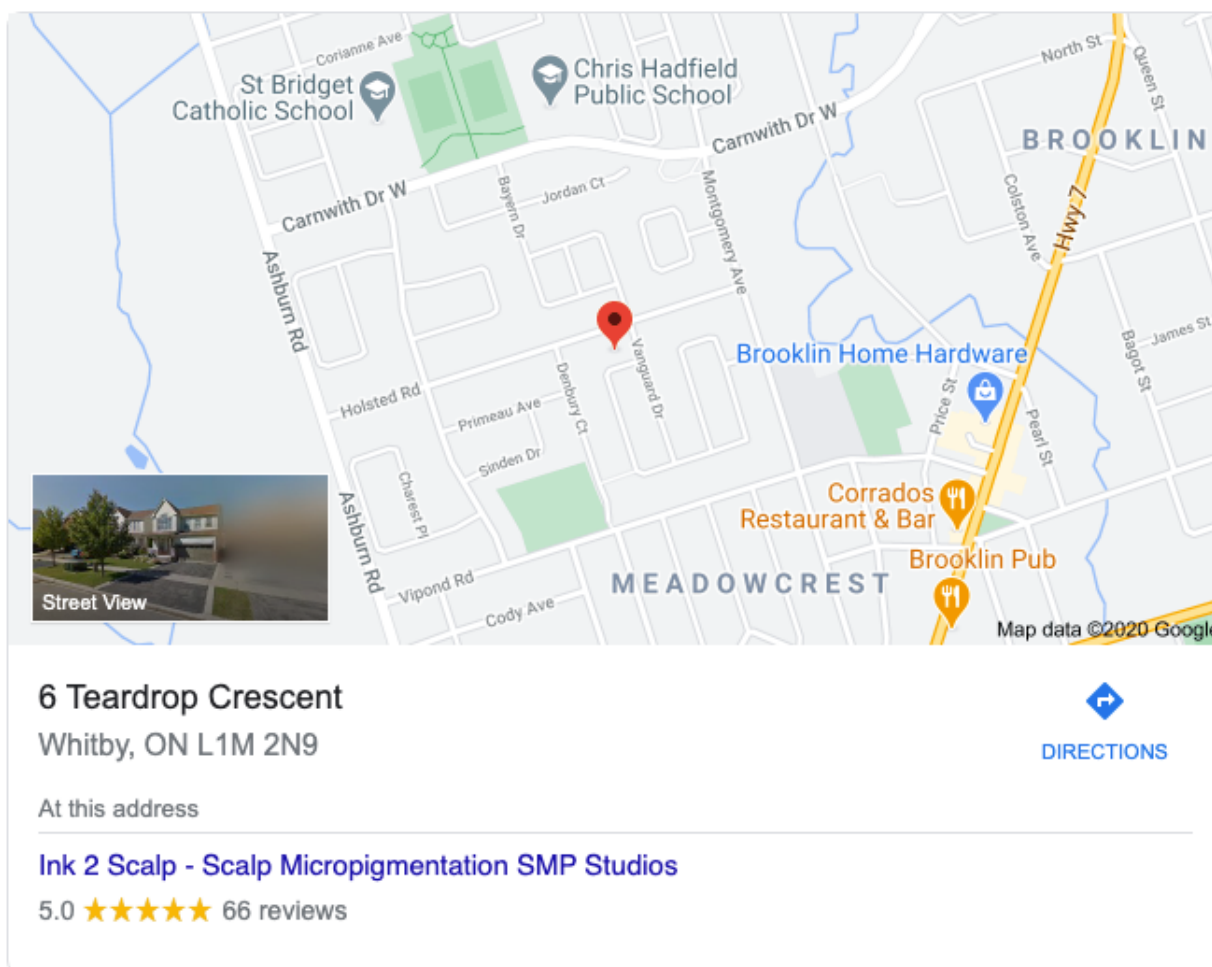

NORWOOD SCALE

The scale helps classify
the stages of male
pattern baldness
on a scale of 1 to 7.

If you could change it, would you?
